

From the main menu, we can go to the menus for the clients, employees, providers, stock, warehouses and other elements' menus.

From the **clientsgeneral.html**, we can access the client list, and the different functions (add, delete, modify), as well as the orders, cost sheets, and create pdfs of the sheets. From the orders function we can also access the function to check the stock. From each of these htmls we can also go back to the clients main menu.

From the **EmployeesGeneral.html**, we can access the employee list, and the different functions (add, delete, modify), as well as the shifts. From the list we can also access the function to modify and delete records. From each of these htmls we can also go back to the employees main menu.

From the **ProviderGeneral.html**, we can access the provider list, and the different functions (add, delete, modify), as well as the receptions. From the list we can also access the function to modify records. From each of these htmls we can also go back to the provider main menu.

From the **StockGeneral.html**, we can go to the functions to check the stock, the products and the analysis of packages. From each of these htmls we can also go back to the stock main menu.

From the **Others.html**, we can access the elements list, and the different functions (add, delete), as well as the distribution of trucks. From each of these htmls we can also go back to the elements main menu.

From the **Warehouse.html**, we can access the warehouse list, and the different functions (add, delete, modify), as well as add and delete elements from the warehouses. From the list we can also access the function to modify records. From each of these htmls we can also go back to the warehouse main menu.

Finally, from the **index.html** we can access the help button and the change background, the login and the product list. From the product list we can sort the results (by price or name), as well as look for a specific product.

Every html has a link to go back to the main menu, the index.html.
